PROJECTS

Travel Management System

📍 Fcrit, Vashi

- Customers input trip details: destination, departure date, return date, and number of passengers.
- Total fare calculated based on factors like distance, mode of transportation, and selected additional services.
- System generates a receipt displaying trip details and total fare upon completion.
- Provides a comprehensive summary for customer reference.

Placement Management System

📍 Fcrit, Vashi

- Students can access visiting company details and previous recruits' packages.
- Recruiters can view details of recruits scheduled for placements.
- Provides easy access to information for both students and recruiters.
- Streamlines the placement process by centralizing relevant data.
